

Quality Objectives

Innovation Technologies

Innovation Technologies is committed to providing remote, long-term, real-time cardiac monitoring to patients worldwide and providing them with insights about their cardiac health through continual improvement, related services, and the overall quality management system

Quality objectives established for the upcoming year:

- Internal audit findings will be one or less,
- Non-conforming final software license check will be maintained at zero,
- Non-conforming device reports will be less than three on an annual basis, and
- Customer complaints will be less than three every year.

The employees will contribute to fulfilling the established quality objectives and implementing and maintaining the QMS with respect to our quality policy.
